Description

The Republic of Albania is the third country for the European Union. This is a country that does not have the principles of the organic farming system in place in place, implemented and applied by the EU. For this reason, the Republic of Albania is not even recognized by the EU as an equivalent third country in the field of bioproduction. The EU rules do not apply to the production of organic farming products (eg biopots, biomass and other organic food) in the administrative area of Albanian agriculture. The purpose of the study visit is:

- obtaining information on the EU legal framework for organic farming,
- EU application of bioproduction rights, i.e. for organic farming in the territory of the Republic of Albania,
- Implementation of the EU's bio-quality rights into practice in Albania (options, criteria),
- start of bio-quality production on biopharmaceuticals on EU principles (excursion from Slovak bio-farms),
- initiating the processing of bio-products for organic food and bio-feeds on the EU principles (excursion from Slovak processors: organic food producers, bioproducers and bio-producers);
- Coordination of the system of organic agricultural production at the state level (Ministry of Agriculture),
- Possibility of trading in bio-products produced in the Republic of Albania in neighboring countries and full harmonization of the law into the EU Member States
