End of Commitment	2019-06-30
Currency	EUR
Status	OECD approved

#### Description

The main aim of the project is to support the democratization process by sharing the transformation and reform experience of the Slovak Republic in the use of remote sensing methods for relevant water bodies (authorities) in Georgia by fulfilling the specific goals:

- (a) develop a system for the use of remote sensing methods and products for monitoring and assessing extreme hydrometeorological situations,
- (b) to incorporate remote sensing methods into national operational monitoring of the impacts of climate change on water resources and strengthen the capacities for their use.
