Description

The project will create the full (24/7) operational capacity of specialized health care facility that focuses on healthcare for children and women. The result of the project will be a fully functional center for 19,587 women and children providing specialized gynecological and obstetric care, treatment for new born and children under 5 years of age in the area of this humanitarian intervention. The main aim of the project is to reduce the morbidity and mortality of women and children by improving access to quality obstetric, reproductive, newborn and pediatric healthcare by ensuring a sustainable coverage of life-saving treatment and care interventions for the vulnerable population of Syria. At the same time, project activities will provide supplies of medicines, medical material and equipment, as well as increase the professional capacity of healthcare personnel that ensures the access to quality and professional healthcare within the specialized health care.
