Start of Commitment	2020-08-10
End of Commitment	2022-02-28
Currency	EUR
Status	OECD approved

Description

Edugame Migration aims to systematically raise awareness of the phenomenon of migration in the context of development aid. The systematic nature of our approach to the topic will be based on the production of an educational game on the topic of migration, to work with 40 trained teachers in Slovakia at secondary schools and secondary schools and thus anchor it in the formal education system. The game will also produce a relatively large PR communication campaign, through which the project will meet the objectives of raising public awareness and development assistance in the context of global challenges, especially for the target group of young people (16-35 years). The added value of the project will be its sustainability as, as part of the other activities of the promoter and the project partner, the educational game produced within the project will be available in the long term and used by the main target groups of the project. After the project ends, the game will be available on a special dedicated portal/program, which will bring together many more educational games and padagogical-methodological materials for teachers in the formal as well as nonformal education sectors. The project will be implemented in Slovakia, while the educational activities of the project will be implemented specifically in the cities of Bratislava, Zvolen, Brezno and Michalovce.

Commitments and Amount Extended (EUR)

Reporting Year	Commitments	Amount Extended
2020	29 618 €	23 694 €
2022	0 €	5 924 €
Total	29 618 €	29 618 €
