Description

The project proposal aims to improve health care conditions of refugees in Lebanon and to decrease their morbidity and mortality. The project will create conditions for provision of quality health care services for more than 22,000 inhabitants of the Dbayeh Refugee Camp in Beirut. Thanks to the project implementation the capacity of a health centre located within the camp will be considerably expanded. The following results are expected: Result 1: Improved access to health care services in Dbayeh refugee camp As a result of the implementation of the project at least 38 000 refugees are expected to be provided needed health care services in premises of a reconstructed and upgraded health center. The center could not be used up to the full capacity due to financial reasons and lack of staff and offered only a limited range of services for the camp inhabitants. More than 2 850 children (under the age of 5). Medical doctor and nurse will be employed and the health center will be regularly supplied with necessary medical equipment according to the patients' needs. Result 2: Access to vaccination in Dbayeh Camp After the reconstruction of the health center a vaccination department will be established. At least 570 children are expected to be enrolled in a vaccination program. Health center will be regularly supplied with necessary vaccines. Result 3: Improved nutrition of children in Dbayeh Camp A anti-malnutrition center will be established within the premises of the health center. It will be regularly supplied with milk and nutrition products based on the current needs and demand of children and their state of health. Cca 1,520 children are expected to be provided nutrition treatment and support. The following activities will take place in order to achieve the planned results of the project: • Reconstruction of the health center • Selection of employees (medical doctor, nurse) • Regular operation of the health center • Regular material and medicinal supply • Establishment of the vaccination center • Regular operation of the vaccination center • Establishment of anti-malnutrition center • Regular operation of anti-malnutrition center • Regular supply of anti-malnutrition products. Implementation of the project will lead to
