Geo Location	Homa Bay, KE
Longitude	34.45714
Latitude	-0.52731
Start of Commitment	2014-11-18
End of Commitment	2016-10-31
Currency	EUR
Status	OECD approved

Description

In line with the Slovak Republic Strategy for Development Cooperation with the Republic of Kenya for the period 2014-2018, the project promotes sustainable and equitable socio-economic development of the Republic of Kenya in education and agriculture. Development problem - the isolated Rusinga Island in Lake Victoria in western Kenya has about 22,000 inhabitants, of whom about half are children under 15 years. As a result of HIV/AIDS, malnutrition, poor hygiene and morbidity, the island has one of the highest mortality rates, both in Kenya and in the world, and therefore a large numbers of orphans. Our organization's project on the island began in 2005; we have been slowly improving the health status of the local community by the successful operation of the health center. Aim of the project - for the development of this area, to enhance the quality of life of the community, and to reduce unemployment, it is extremely important to ensure access to quality education, including the gaining of practical skills for all young people, including orphans, living without any care. The project focuses on sustainable development, not a short-term improvement. Specific objectives - the aim of the project is to build the first part of a secondary school with a dormitory, which will be a continuation of education in the already-built primary school and nursery, both operating exclusively on the principle of non-violent communication. All first graduates of the 8-year elementary school completed their studies with tests in 12/2013 with outstanding results, and were recommended further study. The new high school will be part of a complex project - an existing community center in which we gradually, since 2005, built a nursery and an 8-year primary school, the orphanage for 72 children, a health center with 24h services (including a bed section), 2 playgrounds and a school farm. Currently we are completing the preparation of the construction of the library and computer lab in the complex, which will be completed in 2015. Thanks to our funding program that has provided our organization successfully in Kenya since 2002, young people whose parents cannot pay for studies and of course students without parents will be able to study. The high school education will focus on
